PROFESSIONAL EXPERIENCE

Kohler Company **Kohler, WI**

AI Engineer *June 2025 - Present*

- Led evaluation and rollout of an enterprise Legal AI platform with $2M+ in projected annual outside counsel savings, translating attorney workflows into use cases and defining evaluation criteria, adoption metrics, and ROI with legal leadership
- Independently designed and built an AI pipeline to screen 50K+ competitor products against thousands of design patents, reconstructing images and patent figures as 3D models and ranking infringement risk with custom geometric similarity metrics
- Surfaced 20+ critical CVEs across a 900+ application portfolio by building an AI agent that parses new advisories, maps affected technologies to internal applications, and routes owner-specific alerts to accelerate triage and timely remediation
- Serve on Kohler's AI Operating Committee, shaping enterprise AI priorities, governance, and adoption across functions

Data Scientist *May 2023 - June 2025*

- Led a lead-scoring model POC demonstrating $3.55M in potential annual savings, informing a subsequent vendor selection
- Scoped and built an accounts receivable forecasting POC that demonstrated feasibility and led to a broader engineering effort
- Co-developed an internal customer-persona web app through data preparation, enrichment research, and feature development

Holland Socials LLC **Madison, WI**

Co-Founder *July 2021 - Present*

- Co-founded a digital media company spanning social media marketing, event promotion, and e-commerce, launching and scaling a portfolio of pages to 100K+ total followers through original content, with accounts averaging 12K+ likes per week
- Increased client revenue 150%+ YoY within 90 days through new events and improved promotion, timing, and execution
- Built 4 custom websites and own company analytics, e-commerce infrastructure, technical operations, and brand partnerships

PROJECTS

Qualify — AI Job Search Platform **joinqualify.com**

- Co-founded and shipped an AI-powered job discovery platform for early-career candidates using Next.js, TypeScript, FastAPI, PostgreSQL, and GCP, owning architecture, deployment, monitoring, go-to-market strategy, and product iteration
- Developed LLM- and embedding-based workflows for job ranking, resume tailoring, contact discovery, and targeted outreach
- Engineered ingestion pipelines spanning 70K+ career sites and major ATS platforms, continuously collecting and validating listings through deduplication, filtering, verification, LLM-assisted parsing, and normalization into a personalized job feed

Cynthia — Ambient AI Smart Mirror

- Built an ambient AI assistant in 2019 with a custom smart mirror, wake-word detection, voice interface, live APIs, remote SMS access, and an always-on at-a-glance display for answering questions, managing calendars, and automating tasks
- Overhauled in 2023 around Vertex AI, integrating speech recognition and LLM-powered responses for conversational Q&A

EDUCATION

University of Wisconsin–Madison **Madison, WI**

Bachelor of Science in Computer Science & Data Science; Minors in Mathematics & Leadership

- **Leadership Roles:** Coordinator of Student Leadership Program; Senior Consultant of Google Developer Student Club

SKILLS

Languages, Frameworks & Data: Python, SQL, TypeScript, R, FastAPI, Flask, Next.js, React, Spark, PostgreSQL, REST APIs
AI & Cloud: LLM app development, model evaluation, embeddings, vector search, data pipelines, Azure, GCP, Git/GitHub, CI/CD

CERTIFICATIONS AND INTERESTS

Certifications: Microsoft Azure AZ-900, Microsoft Azure AI-900
Interests: Impromptu speech, Social media marketing, Running, Quantum computing, Billy Joel, Waterskiing
